Smarter Data Runs Your Demanding Business In Real-Time

DEX Systems Software Design & Consulting writes and enhances Oracle based EBS applications to meet your business requirements. Our software is written to leverage real-time data management that highly improves business operations, productivity, and efficiency. We create profits through technology by decreasing costs associated with complex systems by simplifying the design, automating processes, applying controls, and providing real-time insight into your operations. As an expert in the field of software design and verified Oracle BPS Partner, DEX Systems has access to a variety of Oracle resources and software experts necessary to boost your profits. This can be accomplished by writing customizable software, enhancing or optimizing your current software base or by writing GAP software that can increase efficiency between your current systems.

Oracle EBS Consulting Services - Our delivery excellence in Professional Services includes design and deployment of high performance, scalable, and reliable application systems.

CRM - Integration of Customer Relationship Management (CRM) Solutions that streamlines business processes & improves data quality

Service Management - True information-driven customer service that enables your agents and technicians to meet and exceed customer expectations by empowering them with information that is consistent, accurate, and actionable

Financial - Manage your global finance organization from a single, integrated system and comply with multiple legislations, accounting standards, and policies

HR – Consistent approach to HR policies, reports business metrics from a single source, and provides a "global engine" for worldwide HR management

Project Management - Comprehensive analytic solutions that deliver insight and efficiency into project-based data to seamlessly track the lifecycle of a project

Supply Chain – Reductions on spending of goods and services, streamlines procure-to-pay processes, and drives policy compliance

Planning - Manageable processes that speed decision making and continuous monitoring of the impact of those decisions at all levels in the organization

Execution - Provide users unprecedented flexibility in how they purchase, design, implement and manage

Software languages Include but are not limited to:

ORACLE® Oracle Forms, Oracle Reports, PL/SQL, Java: Struts/Spring, J2EE Web Apps: HTML/JSP and Web Services

---

Our Solutions have helped a variety of clients with their Oracle projects, including Cisco, Intel, GE, DHL, Harbor Freight, and Dignity Health. In a recent case study, DEX Systems Software shows how labor costs were reduced for a Fortune 500 company by 45% in as little as twelve weeks. Download the case study at http://www.dexsystems.com/DEXsystems_CaseStudy_November_2013.pdf
